**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Jackson (US 6,186,662). Jackson discloses forming an elongated bag with a base end and an open end, and coupling a weight to the base end to assist the bag to remain in an upward position when stationary and to assist in defining a deployment trajectory when thrown. See figures 1 and 4 embodiments and column 5, lines 21-36.

3. Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Cameron (US 4,713,033). Cameron discloses forming an elongated bag with a base end and an open end, and coupling a weight to the base end to assist the bag to remain in an upward position when stationary and to assist in defining a deployment trajectory when thrown. See figure 3 embodiment.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 2-5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Witt et al. (6,267,244). Witt discloses a bag with a base end and an open end; and an extension cord located within the bag, the extension cord having a first end and a second end, the first end being positioned at the base of the bag, and the second end extending towards the open end. See Figures 1-8 embodiments.

With respect to claims 4 and 5, note the second opening (122) and the cord-retaining element (hook and loop fastener 123) in Figure 2 embodiment.

With respect to claim 7, note strap (118) coupled to the bag to facilitate carrying the bag.

With respect to a weight being coupled to the base, note the annular support (360), which can be affixed inside or outside the interior compartment of bag (310) by metal rivets (365), see column 4, lines 19-23. With regard to the location of the annular support, it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the annular support in the base area of the bag to provide more support in the base of the bag.

Claim 2 is the obvious method of using the Witt bag as modified above.

***Response to Arguments***

7. Applicant's arguments filed November 16, 2006 have been fully considered but they are not persuasive. Contrary to applicant's argument the annular support of the bag of Witt can be construed as weight.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
